CF40-S160 13' Tall Spiral Show Flag + Telescopic Pole

Instructions

Step 1:

Extend telescopic pole sections completely and secure by twisting tightly. **It is recommended to tape the sections or take down the pole during heavy winds.**

Step 2:

Slide flag onto pole until top cord can reach the tip of the pole.

Step 3:

Tie cord onto top ring tip so flag can hand hang freely.

Step 4:

Place flag on stand (optional) or onto included ground stake and PVC adapter. **Caution: Avoid high voltage wires and machinery. Give flag enough room to move during normal windy conditions.**

Step 5:

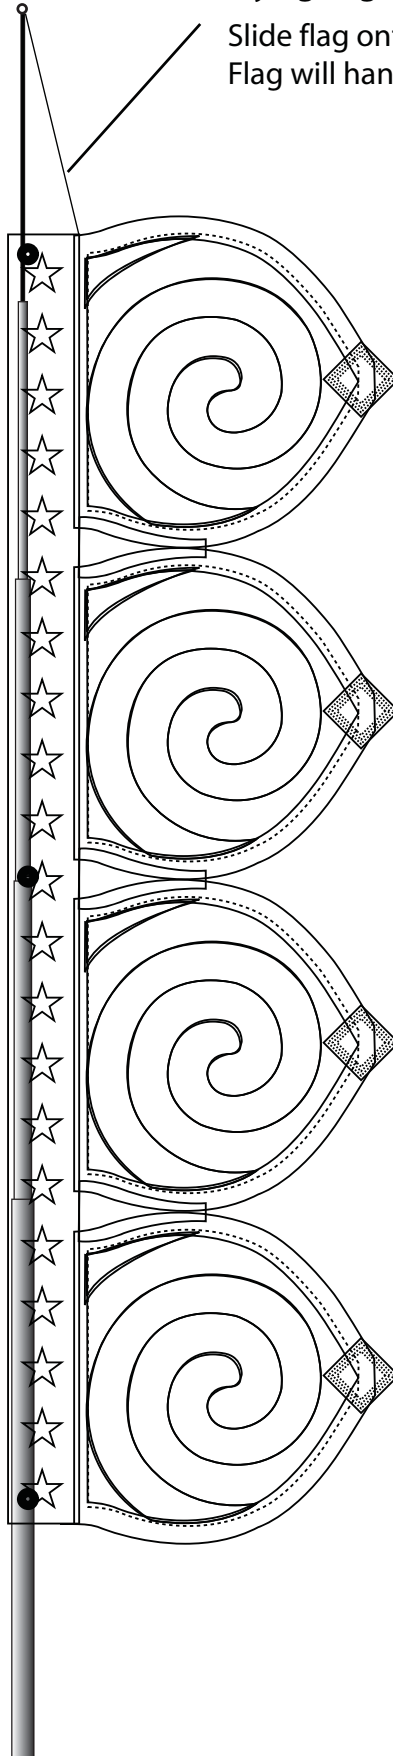

Bottom cord can be used to secure bottom of flag to pole clip if needed.

Flying flag on telescopic pole

Slide flag onto pole. Tie cord to top ring.
Flag will hang from cord.

Optional - Low / No Wind Bow Setup

We recommend removing the bow during periods of heavy winds or taking down the flag entirely to avoid damage to the panels.
